

kick scooter milling machine

General information

The kick scooter milling machine is for the widening of hair line cracks in asphalt and concrete surfaces. The agile construction allows it to follow the path of fierce cracks optimally.

Advantages

- Very agile
- Quick lift for safety
- Water sputtering
- Milling depth with stoppers
- Very handy

technical data

drive:	6,5 HP
milling depth:	0 - 25 mm straight cut or wedge joint cut
milling width:	8 mm
weight:	without water ca. 40 kg
milling wheel discs:	125 x 6 mm 115 x 6 mm wedge disc
